Tel: + 91 79 2327 6611 / 6612; Fax: + 91 2327 6613;

Website: www.gnlu.ac.in

CONCEPT NOTE

Supremacy in airspace is essential in the modern world in order to dominate the affairs on ground. Aviation infrastructure has been a prime target of global terrorism. Further, aviation industry continues to be inherently risk prone due to frequent accidents. Therefore, an effective air defence constitutes topmost priority for the nations and India is no exception. Safety, security and liability of various stakeholders are paramount concerns of Air Law at the international as well as domestic level. Space age began with the launch of Sputnik-I in 1957 in the backdrop of cold. With the lightening pace of scientific and technological advancement in space technology, select few States extended their supremacy in air to space as well. Those who have not, aspire to do so in the near future. Space activities are also exemplification of international cooperation. Rising human activities in space have posed unprecedented issues particularly relating to safety and security. Space law has addressed these issues through various international conventions and treaties. Besides, nations have developed their own policy regarding space to address the issues at domestic level. With the recent success of Mangalyan, India has become fourth country in the world to enter Mars orbit – a feat achieved at relatively fractional cost and time. India has also established its name in global satellite launch and manufacturing industry. A sound understanding of intricacies of Air and Space law is highly desirable for various stakeholders involved in aviation and space activities in one form or the other but is also necessary for those charged with the responsibility of ensuring safety and security thereof.

AIMS AND OBJECTIVES

- To acquaint participants with various aspects relating to safety and security of aviation and space activities.
- To enhance participants' understanding of the various principles contained in international instruments meant for regulating Air and Space Law.
- To enable the participants to understand the various dispute redressal mechanisms in Air and Space Law and their efficacy.
- To familiarize participants with different approaches adopted by various nations (Russian Federation, US, UK, France, Germany, Canada, Australia, China, Japan, India) within their jurisdiction.
- To enable participants to appreciate the challenges in developing National Space Policy and Air and Aviation Policy.

Themes for Substantive Sessions

- Latest issues in Air & Space Law
- Current Challenges relating to Territorial Sovereignty and its extension in Air and Space
- Aviation related crimes and Aerial Terrorism
- Air Accident and Incident Investigation
- Regime governing Military and Civil Airports
- Case Laws on International Air Law Disputes
- Space laws – Contemporary Challenges

Expected Tangible Outcomes

- Identification of gaps and propose workable legal and policy solutions to the policy-makers and implementing agencies to ensure high standards in safety & security of aviation & space.
- Creation of network of experts and specialists, law firms, officials from air force and space agencies.

Measurement of Outcomes

- Case-study presentation and analysis
- Availability of relevant legal and policy framework documents
- Establishment of e-learning resource and database
- Bring participants in direct contact with experts and specialists

Stakeholders

- Legislative and Regulatory Authorities
- Air Force Officials; space agencies and organisations
- Aviation Industry Associations of India and Abroad
- National Security Authorities
- International organizations
- Private and Public Capacity-building Institutions
- Faculties, Researchers and Fellow Students from various countries.
